Infochord Technologies Pvt. Ltd.

1. **Project Description**
2. **Module , Features & Function**
3. **Development Language, Server & Database**
4. **User Story**

❖ Project Description

The News Portal Web Application is a web-based content management system developed to simplify the process of news publishing and management. The application provides a secure, role-based platform where Administrators, Editors, Reporters, and Members can perform their respective responsibilities efficiently.

The system follows a structured news approval workflow. Reporters create and submit news articles along with images, category, location, and descriptions. Submitted news remains in a Pending state until it is reviewed by an Editor. The Editor can edit, approve, publish, or reject the news with an appropriate reason. Once approved, the news becomes visible to Members and other visitors of the portal.

❖ Module & Specification

1. **Authentication Module**

Description

This module handles user registration, login, logout, account verification, and password management.

Features

- User Registration
- User Login
- Logout
- Change Password
- Forgot Password (Future Enhancement)
- Session Management
- Role-Based Authentication

Users

- Admin
- Editor
- Reporter
- Member

2. User Management Module (Admin)

Description

This module enables the Administrator to manage all registered users.

Features

- View Users
- Verify New Registration
- Block / Unblock Users
- Remove Users
- View User Details
- Search Users

Managed Users

- Editors
- Reporters
- Members

3. Profile Management Module

Description

Every logged-in user can manage their personal profile.

Features

- View Profile
- Update Name
- Update Mobile Number
- Update Email
- Upload Profile Photo
- Change Password

Users

- Admin
- Editor
- Reporter
- Member

4. Category Management Module

Description

Allows the administrator to create and manage news categories.

Features

- Add Category
- Edit Category
- Delete Category
- Activate / Deactivate Category
- View Category List

Managed By

- Admin Only

5. Location Management Module**Description**

Allows the administrator to manage available news locations.

Features

- Add Location
- Edit Location
- Delete Location
- Activate / Deactivate Location
- View Location List

Managed By

- Admin Only

6. News Management Module**Description**

Allows reporters to create news and editors to manage the approval process.

Reporter Features

- Add News
- Upload News Image
- Select Category
- Select Location
- Write Short Description
- Write Full Description
- Submit News

Editor Features

- View Pending News
- Edit News

- Publish News
- Reject News
- Add Reject Reason

Admin Features

- View All News
- Delete News
- Manage Published News

7. News Approval Module

Description

Controls the approval workflow before news becomes visible.

Workflow

Reporter

Submit News

Pending News

Editor Review

Publish / Reject

Published News

8. Member Module

Description

Provides features available to registered members.

Features

- Read News
- Like News
- Comment
- Bookmark News
- Share News
- Search News
- View Recent News

9. Comment Module

Description

Allows members to comment on published news.

Features

- Add Comment
- Edit Comment (Optional)
- Delete Own Comment
- View All Comments

10. Like Module

Description

Allows members to like published news.

Features

- Like News
- Remove Like
- View Total Likes

11. Bookmark Module

Description

Allows members to save news for future reading.

Features

- Save News
- Remove Bookmark
- View Saved News

12. Search Module

Description

Allows users to quickly search for news.

Features

- Search by Title
- Search by Category
- Search by Location
- Search by Keyword

13. Dashboard Module

Admin Dashboard

- Total Members
- Total Reporters
- Total Editors
- Total Categories
- Total Locations
- Total News
- Pending News
- Published News
- Rejected News

Editor Dashboard

- Pending News

- Published News
 - Rejected News
 - Total Approved News
-

Reporter Dashboard

- Total Submitted News
 - Pending News
 - Published News
 - Rejected News
-

Member Dashboard

- Profile
- Saved News
- Liked News
- Comment History

14. Notification Module (Future)

Features

- News Approved Notification
- News Rejected Notification
- New Comment Notification
- New Like Notification

15. Reports Module

Admin Reports

- User Report
- News Report
- Category Report
- Location Report

- Published News Report
- Pending News Report
- Rejected News Report

Editor Reports

- Approved News Report
- Rejected News Report

Reporter Reports

- Submitted News Report
- Published News Report
- Pending News Report

Summary of Modules

Module	Description	Access
Authentication	Login & Registration	All Users
Profile Management	Manage Profile	All Users
User Management	Manage Users	Admin
Category Management	Manage Categories	Admin
Location Management	Manage Locations	Admin
News Management	Create & Manage News	Reporter, Editor, Admin
News Approval	Publish/Reject News	Editor
Member Module	Read & Interact with News	Member
Comments	Add/View Comments	Member
Likes	Like News	Member
Bookmarks	Save News	Member
Search	Search News	All Users
Dashboard	Statistics & Overview	Admin, Editor, Reporter

Module	Description	Access
Reports	Generate Reports	Admin, Editor, Reporter
Notifications	Alerts & Updates	Future Enhancement

Development Language, Server & Database

Technology Stack:

- **Frontend:** HTML5, CSS3, Bootstrap 5, JavaScript
- **Backend:** PHP
- **Database:** MySQL
- **Server:** Apache (XAMPP)
- **Database Connectivity:** PHP MySQLi

5. Database Design

The News Portal Web Application uses four main database tables to store and manage application data.

5.1 Category Table

Table Name: category

Purpose:

This table stores all news categories used while publishing news articles.

Field Name	Data Type	Description
cid	INT (Primary Key, Auto Increment)	Unique Category ID
category_name	VARCHAR(100)	Name of the News Category
date	TIMESTAMP	Category creation date and time

5.2 Location Table

Table Name: location

Purpose:

This table stores the locations associated with news articles.

Field Name	Data Type	Description
lid	INT (Primary Key, Auto Increment)	Unique Location ID
location_name	VARCHAR(100)	Name of the Location
date	TIMESTAMP	Location creation date and time

5.3 User Details Table

Table Name: user_details

Purpose:

This table stores all registered users including Admin, Editor, Reporter, and Member.

Field Name	Data Type	Description
uid	INT (Primary Key, Auto Increment)	User ID
name	VARCHAR(100)	User Name
mobile	VARCHAR(15)	Mobile Number
email	VARCHAR(100)	Email Address
password	VARCHAR(255)	User Password
photo	VARCHAR(255)	Profile Photo
role	VARCHAR(20)	User Role (Admin, Editor, Reporter, Member)
category	INT (Foreign Key)	References category.cid
location	INT (Foreign Key)	References location.lid
is_verified	TINYINT(1)	Account Verification Status
is_delete	TINYINT(1)	Soft Delete Status
date	TIMESTAMP	Registration Date

5.4 News Table

Table Name: news_table

Purpose:

This table stores all news articles submitted by reporters.

Field Name	Data Type	Description
nid	INT (Primary Key, Auto Increment)	News ID
heading	VARCHAR(500)	News Heading
n_category_id	INT (Foreign Key)	References category.cid

Field Name	Data Type	Description
n_location_id	INT (Foreign Key)	References location.lid
description	TEXT	Complete News Description
news_image	VARCHAR(255)	News Image
posted_date	TIMESTAMP	News Posting Date
reporter_id	INT (Foreign Key)	References user_details.uid
editor_id	INT (Foreign Key)	Editor who approved the news
is_publish	TINYINT(1)	Publish Status (0 = Pending, 1 = Published)
is_delete	TINYINT(1)	Soft Delete Status
